

# EXPLORATION DRILLING COMPANY IN PAPUA NEW GUINEA

*Traverse Drilling International Pty Ltd*

## 2CRisk™

*“2CRisk is an invaluable tool that has enabled us to quickly assess an incident at a remote site, generate a plan and quickly gain management support for action.”*

*Liam Holmes, Risk Manager,  
Traverse Drilling International*

With a geographically diverse workforce, there was a need to work with providers locally but review all health related information centrally to develop a consistent approach to health management.

## INDUSTRY:

Resources

## LOCATION:

Brisbane Australia HQ, Operations in Papua New Guinea (PNG), Mongolia, Indonesia & Fiji

## SCENARIO:

Established in 2007, Traverse Drilling is an Australian based exploration drilling business, servicing the mining industry wherever they operate. Their operations are all offshore with a workforce of expatriates and nationals.

With a commitment to workplace health and safety, Traverse have the challenge of ensuring that all workers undergo a medical assessment prior to deployment, with 5 yearly re-assessments, and also managing health issues (both domestic and work related) on site.

## BENEFITS OF USING SOFTWARE:

- ✓ One consistent view of all health data.
- ✓ Reporting helps communicate to non-health people areas of risk and what needs to be done.
- ✓ Identifies specific health needs to allow targeted interventions from pre-employment screening to injury management.
- ✓ Comprehensive case management for ‘difficult’ cases.
- ✓ Improves confidence and outcomes for claims that go to court – easy to produce a complete evidence trail.
- ✓ Drills down to give real time analysis and enable quick and efficient execution.
- ✓ Helps manage resources either for pre-employment screening or other health issues.
- ✓ Easy to use – simple data entry, easy to read screens and clear management reporting.
