

CONTROL PANEL

Traditional software takes a long time to implement, usually requires customisation by IT people and takes a long time to get used to.

Also, as your business changes, so do your requirements for the technology you use and more often than not, this requires calling in skilled IT people.

2CRisk has been specifically designed to address these challenges and to make the best use of contemporary software development approaches.

Our control panel enables you to quickly tailor 2CRisk to meet your needs and you can keep on changing and adapting over time.

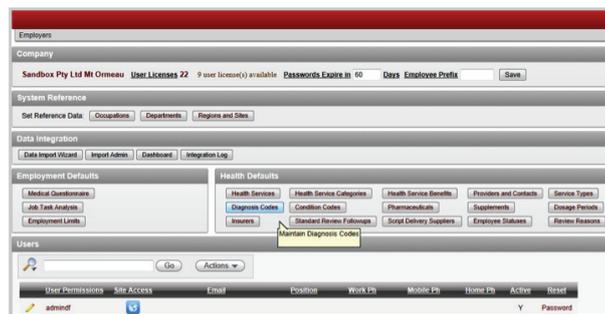

Business is not static. To be agile as a business you need agile solutions that you can tailor to meet your needs.

ORGANISATIONAL BENEFITS

- ✓ Change 2CRisk to meet your needs without calling on IT expertise.
- ✓ Adapt 2CRisk as your business needs change.
- ✓ Design your own health services to maintain IP.
- ✓ Confidence that the data is stored securely and users are only seeing the data they need.
- ✓ Import data from any source without having to build and maintain an expensive interface.
- ✓ Tailor classifications to use language that makes sense.

- ✓ Build your own medical questionnaires or chose from the 2CRisk menu.
- ✓ Set and maintain your exceptions and notifications.
- ✓ Select the health metrics you want to capture and report.
- ✓ Select the occupations and locations to which your health programs apply.
- ✓ Maintain email groups.
- ✓ Use the simple data import wizard to import .csv files.
- ✓ Maintain key reference and master data to help assure data integrity.
- ✓ Set user permissions to manage sensitive information.
- ✓ De-identify records for reporting.
- ✓ Provide restricted access to 3rd parties.
- ✓ Reset passwords.

Set up and maintain 2CRisk to work for you.

The control panel provides the ability to maintain reference data, import data, maintain user permissions and tailor the application to meet your needs. Once your administrator(s) are trained, this reduces the need for help from 2CRisk, but our support desk is always there to help you if you need it.

Tailor your health programs.

This is an example of how flexible the 2CRisk platform is. Here is a health risk assessment that has some key metrics to be captured and reported on. Any health service is simple to set up using the health service wizard.
